APPLICATION FOR WATER SERVICE

We, the undersigned, do hereby apply for water service for the property located at lot ____, Tollgate.

Tollgate Water Company will provide, at our expense, a one-inch schedule 40 water line from the nearest water main to our property line. In addition, a meter loop and hookup connector will be installed at our property line for the normal fee of \$500.00. All lines up to and including the hookup connection shall remain the property of and responsibility of Tollgate Water Company. The current year developed lot rate will be charged for water usage. All lines and installations beyond the hookup will be our responsibility.

Water connection shall be made and the required fees paid prior to the completion of foundation work.

In making this application, we, the undersigned, do hereby agree to fully comply with and be bound by the rules, regulations, policies and procedures set forth in the Tollgate Water Company Water Policy as it presently exists and as it is hereinafter amended.

PREPARATION FOR YOUR WATER CONNECTION

Prior to any water service installation property owner must meet with the Maintenance Manager on site.

These simple procedures will ensure that your house plumbing is not damaged by debris and the hookup can be completed in a timely manner.

Dig your trench 30" deep to valve box.

Remove earth 12" on both sides of valve box.

Cover the end of your pipe by a means that will prevent introduction of rock or dirt.

For temporary connection, please dig the hole large enough for an adult to access the valve without unusual contortions. Digging a step will make this job easier for both you and the Water Company staff.
